

Pro tip!

Make sure your plastic is clean and dry before bringing it to school. No food or wet stuff, please!

School Plastic Film Drive

Plastic film is thin, flexible plastic. Generally, you can stretch it and poke your thumb through it easily. Here are some of the most common examples:

GROCERY BAGS

ZIPLOC BAGS

SHIPPING ENVELOPES

BUBBLE WRAP

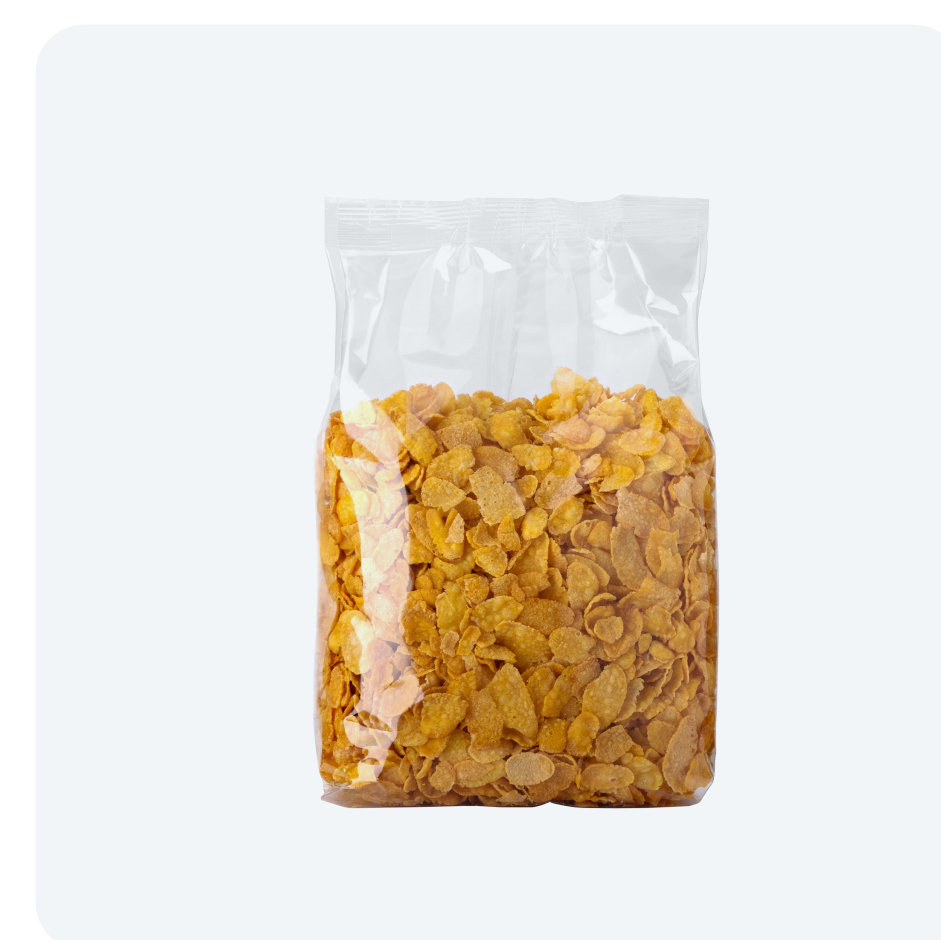

AIR PILLOWS

BREAD BAGS

PRODUCE BAGS

CEREAL BAGS

DID YOU KNOW?

Plastic film isn't accepted in curbside recycling bins because it gets tangled up in machinery, causing issues at recycling facilities. Because of this, most plastic film ends up in the trash. By giving it to Ridwell, you're helping keep harmful plastics out of our environment!
